

BIO

Since my young ages, I have worked in many stages of the woodworks and furniture industry (fixed and movable furniture) like joinery, joinery installation, manufacturing furniture, furniture assembly, leading the furniture assembly teams etc. With the experience and knowledge of many years, I have successfully worked in many large-scale international projects like hospitality, hotels, conference centres etc. Besides these I am an expert for the manufacturer and installer of house furniture and woodworking (wardrobe, bed frame, door, window etc...) office furniture (desk, chair, drawers...), villa projects, kitchen furniture etc. I have always considered quality and discipline first in my works.
